

PRODUCT SPECIFICATION SHEET

Description

- PSF® is a lab tested and field-proven liquid tire sealant that protects tires from punctures. The proprietary blend of corrosion inhibitors, polymers, and fibers help maintain tire pressure while it protects tire rims from rust.

Uses/Benefits

- Ideally suited for off road applications (skid steers, loaders, OTR).
- Rapidly seals punctures up to 3/8" inch on heavy ply tires.
- Non-toxic, non-hazardous.
- Water cleanup.
- Preserves tire liner for permanent repairs.
- Contains no ethylene glycol.

Available Formulas

- Regular/OTR , freeze point 7°F/-13°C
- All Weather, freeze point -4°F/-20°C

Available Packaging

- 1-gallon jugs
- 6-gallon pails
- 55-gallon drums
- 275-gallon totes
- 330-gallon totes

Limitations

- PSF® is not intended to replace the proper repair of a damaged tire.
- Not for use in passenger vehicles.
