CRANE	On/Off Road	10.5R25	40
CRANE	On/Off Road	11R22.5	40
CRANE	On/Off Road	385/95R25	40

How to know you are right

When the proper quantity has been applied, your tires will dismount easily, rim rust will be eliminated, and the tire inner-liner will benefit from anti-oxidant protection.

Notes:

1. For best use, you should make sure your wheels/rims and tires are well cleaned prior to installing Tire Life®. Tire Life® will clean rust and corrosion from your wheels/rims through the natural washing action created by a truck in motion. Tire Life® can be installed with an applicator tank into a mounted assembly without prior cleaning, but then should be checked or changed between 30 to 90 days.
2. A good rule of thumb for judging the correct amount of Tire Life® per tire: If you dismount the tire and have 50% or more of the original install amount left in the tire then you are within good operating tolerances for the effectiveness of Tire Life®.
3. Please contact your Fuller Brothers' Representative if you have any questions or if you would like an on-site assessment with follow up recommendations.
